Hi Sherry,

I've spoken with Mark Herman from our Great Plains Region. Our conclusion was if the Lac du Flambeau tribe wanted insight into BIA experiences with air sparging we would be happy to conduct a separate conference call with them. We did not feel it was appropriate for BIA to participate in your call on Monday.

We will relay our offer of technical assistance to the Lac du Flambeau tribe and we can certainly keep you informed if that call does happen.

Thank you.

Scott,

I am trying to reach someone at BIA that may be familiar with work done to cleanup up petroleum LUST sites in Indian Country. I am trying to reach Mark Herman at BIA but then also learned of your contact information.

I understand that BIA had or has a national contract to do this work. Bottom line- we are looking for someone with experience with lots of sites to verify the efficacy of air sparging/soil vapor extraction technologies for these sites. We have a tribe in the Midwest that doubts its suitability and we want someone with experience to tell them it can work.

I appreciate any help you can provide.

Regards,

Sherry

Hi Sherry,

Here is a contact name at BIA in your region that I received from someone I have worked with at BIA in Tennessee on a few brief occasions (see attached email).

Also, I believe EPA Regions 10, 9 and 8 (?) have worked with BIA on LUST sites but I don't recall in exactly what capacity. It may be worth reaching out to them too (or asking on Hal's workgroup call?)

Subject: BIA

Will or Hal,

Do you know of a contact of someone at BIA that is involved in the cleanup of UST sites? I was talking to a consultant yesterday about ideas he had for who could provide some testimonials for our LDF call on 8/28/17. He said he was aware of the BIA program that

cleans up UST sites. He thought it was a national contract. Do you know anyone at BIA that we could call?

Sherry

Hey Judy,

It was great to hear from you. Below is the contact you need for our Midwest Office.

Please let me know if I can help with anything else.
